## ABOUT ME

Experienced Full-Stack Developer with a strong background in designing, developing, and implementing web-based applications across diverse industries. Proven expertise in managing complete project lifecycles from backend and frontend development to database management, ensuring seamless integration and optimized performance. Skilled in developing RESTful APIs and managing inventory, POS, and booking systems. Demonstrated ability to collaborate within teams to deliver customer-focused solutions and achieve project goals. Proficient in using technologies including HTML, CSS, Bootstrap, JavaScript, jQuery, Ajax, Laravel, MySQL, and API integration.

## WORK EXPERIENCE

### Software Development Engineering        2023/02 - current
**Oway Travel & Tour**

Backend Development: Designed, developed, and optimized scalable backend services to support dynamic application needs. Implemented RESTful APIs and integrated complex business logic within robust backend systems.

API Integrations: Spearheaded seamless API integrations with frontend and mobile applications (Android and iOS), ensuring smooth data flow and high performance. Collaborated on complex third-party integrations with airlines and hotel services, enhancing booking functionality and user experience.

Development Stacks: Leveraged expertise in PHP and the Laravel Framework for rapid application development and efficient backend solutions. Proficient in Golang, creating lightweight and high-performance applications with a focus on concurrent processing.

Database Management: Managed and optimized database operations across MongoDB, Redis, and MySQL to ensure reliable data storage, caching, and retrieval for high-demand applications.

Infrastructure and Deployment: Utilized AWS services, including EC2, CodePipeline, CodeDeploy, S3, and CloudFront, to deploy, monitor, and scale applications. Automated deployment pipelines to ensure efficient code delivery and minimized downtime, leveraging CodePipeline and CodeDeploy for continuous integration and deployment.

### Full Stack Developer        2019/05- 2023/02
**Myanmar IT Consulting Co.Ltd**

Analyzed requirements and designed, developed and implemented software applications for multiple websites and web applications.Used various technologies, including web development to make code repairs and optimize corporate websites and web applications Developed customer's web applications
