Maezeekone Street, Hlaing Township, Yangon

EDUCATION

B.C.Sc (Mandalay)

University of Computer Studies

Specialize Computer Science

2013 - 2018

SKILLS

- HTML , CSS
- JavaScript , jQuery , AJAX
- Bootstrap
- Wordpress / CMS
- PHP
- Laravel / Api
- Go
- GitHub
- Photoshop
- AWS
- Kafka / Loki

CERTIFICATES

- PHP Web development Bootcamp
- Computer basic course

PERSONAL PARTICULAR

Nationality - Myanmar

Date of Birth - 7 / 2 / 1996

Gender - Male

ABOUT ME

Experienced Full-Stack Developer with a strong background in designing, developing, and implementing web-based applications across diverse industries. Proven expertise in managing complete project lifecycles from backend and frontend development to database management, ensuring seamless integration and optimized performance. Skilled in developing RESTful APIs and managing inventory, POS, and booking systems. Demonstrated ability to collaborate within teams to deliver customer-focused solutions and achieve project goals. Proficient in using technologies including HTML, CSS, Bootstrap, JavaScript, jQuery, Ajax, Laravel, MySQL, and API integration.

WORK EXPERIENCE

Software Development Engineering 2023/02 - current

Oway Travel & Tour

Backend Development : Designed, developed, and optimized scalable backend services to support dynamic application needs. Built robust server-side architectures and implemented RESTful APIs to handle complex business logic and high-volume application requests.

API Integrations : Led seamless API integrations between backend services and frontend/mobile applications (Android & iOS). Successfully integrated multiple third-party travel service APIs including flight, hotel, insurance, and bus booking systems, enabling a unified booking platform and improving overall user experience and system performance.

Payment Integrations : Implemented secure payment gateway integrations to enable reliable online transactions. Developed payment processing logic, transaction verification, and error handling mechanisms to ensure smooth and secure payment workflows.

Development Stack : Utilized PHP (Laravel Framework) for rapid application development and scalable backend systems. Experienced in Golang for building lightweight, high-performance services with efficient concurrent processing.

Database Management : Managed and optimized database systems including MongoDB, Redis, and MySQL to ensure efficient data storage, caching strategies, and fast query performance for high-traffic applications.

Infrastructure & Deployment : Deployed and managed scalable applications using AWS services such as EC2, S3, CloudFront, CodePipeline, and CodeDeploy. Built automated deployment pipelines to streamline CI/CD processes and minimize application downtime.

Project & Process Management : Collaborated with cross-functional teams including frontend, mobile, and QA engineers to deliver projects efficiently. Followed structured development workflows, maintained version control, and ensured high-quality code through organized project management practices.

WORK EXPERIENCE

Full Stack Developer 2019/05- 2023/02

Myanmar IT Consulting Co.Ltd

Analyzed requirements and designed, developed and implemented software applications for multiple websites and web applications.Used various technologies, including web development to make code repairs and optimize corporate websites and web applications Developed customer's web applications
